

Chair Dimensions

Row Length Breakdown

- Chair width is figured between any like points of adjacent chairs (usually from center of armrest to center of armrest).
- Typical row length is the summation of chair sizes plus 4".
- Each aisle standard occupies 2" added space in a row.
- Add 1" for tablet arm at the aisle standard.
- Add 1" for cupholder on the aisle standard.
- Measurements should be taken along the row size line.

Note: 3" overhang required for Cupholders, Tablet Arms & Rockers.
